

SUMISANSUI R WIDE

FOR MORE THAN 40 YEARS IN THE MARKET, "SUMISANSUI" HAD BEEN ADAPTED TO MULTITUDE VEGETABLE FARMING. "SUMISANSUI R WIDE" INTRODUCES EFFICIENT WAY TO FARMERS IN THE WORLD.

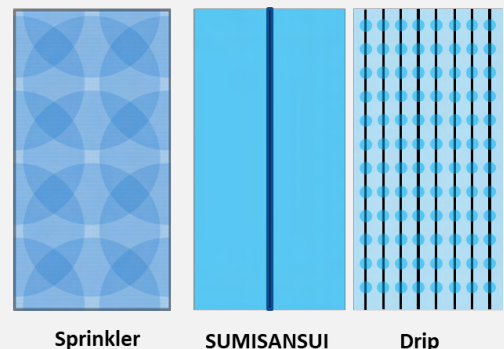

HIGH UNIFORMITY & SOFT SHOWERING

Sumisansui R Wide covers wide area 100m*10m only with single line. From beginning to the end, side to side, high uniformity of water softly wet fields. Soft shower does not harden field and not spatter soil.

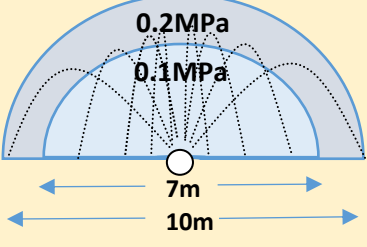

EASY SET UP & TAKE AWAY

Pursuing efficiency standing on farmer side, Sumisansui R Wide grants easy set up and take away with flat tube and smart accesaries. Long lasting twist resistance tube is portable with winder and requires low operating pressure.

Difference of Water distribution between irrigation systems

SPECIFICATION

ITEM	SPECIFICATION
Irrigation Range	
Water Pressure	0.1~0.2MPa
Tube Width	62mm (34mm φ)
Max. pressure	0.2MPa
Material	Black polyethylene
Packaging	Rolled on plastic reel
Sales Unit	100m*2rolls/box

WATER FEED RATE

Tube Length /Water Pressure	0.1MPa	0.15MPa	0.2MPa
40m	1.08	1.32	1.67
60m	1.07	1.31	1.61
80m	1.05	1.29	1.53
100m			1.46

Unit: L/min.m

WATER AMOUNT

Example

Pressure 0.2MPa

Length of Tube 80m

= 1.53L/min.m * 80m *1line

= 122.4L/min.

ADVANTAGES

- Applicable to various crops. For Root vegetables, Leaf vegetables, flowers and tree plantation.
- Low operating pressure enables to use wide range of environment.
- By setting high position (picture on right), it will not disturb farmer's work and usable for middle to long term growing.
- Compact and portable with Winder II -B.
- It is durable for more than 5 years. Environmentally friendly.

"Holder R" to fix on ground, or to elevate tube with rods

Winder II -B

ACCESARIES

Start Connector R

Tube Connector R

Tube Stopper R

Tube Filter R
